

Broadcast via Google+

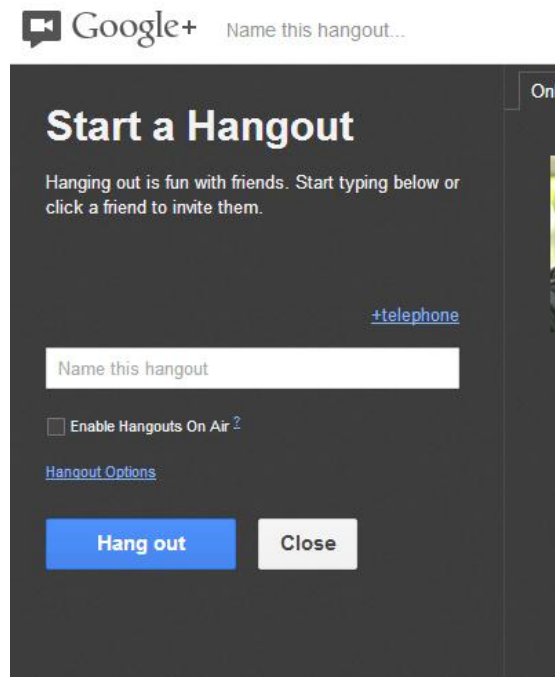

1. Create a gmail account for school. Harmony emails do not support G+.
2. After you create gmail account, you will see a +You link on top left corner of the page.

3. When you go to that, customize the account. Give a name etc...
4. After you see the page below, click on Start Hangout Link on the top right side of the page.

5. Click on that and see the page below.

6. On this page, name your hangout, like Science Olympiad etc. and check the **Enable Hangouts on air** checkbox. This is what allows you to broadcast on the web.

7. Since you are using it first time, it will ask you to verify the account. Follow the steps. You will enter your cell phone number and get a verification text message.
8. Click blue Hangout button and you will see the links at the top of the page.

9. Click on Start Broadcast button.
10. Broadcast will start in a few seconds. When it is broadcasting, if you click on Embed link, you will see the Youtube link for the live channel.

11. So far, we broadcasted with a laptop.
12. In order to broadcast Ipad camera, you need to use Airserver.
13. Download Airserver software on the same laptop you want to broadcast. Connect your Ipad to your laptop through Airserver.
14. Next step, go to broadcast page and click on Screenshare button on the left hand side of the page. You will see all the documents open on your computer. Select Airserver that is connected to your Ipad or Iphone.

You should see it on Youtube now. If not, go back to all these steps...

Thanks.
